Commit to Foster One Litter

Kitten season starts now and lasts through the fall months. An animal shelter is the last place kittens should be because their undeveloped immune system makes it very easy for them to get sick, suffer and often die.

The solution is providing temporary foster homes for these babies until they are old enough for adoption, anywhere between 8 to 12 weeks. Can you help?

If you have never fostered kittens before, it is a joy not to miss. Email mikey@companionanimaltrust.com or call **201 884 9649**

Must love animals, no experience necessary!
